# About Bruns Eco Village

We are a group of local residents from the Byron Shire region. We're designing a new way of living - an eco village that will provide homes for people high above Brunswick Heads in Byron Shire.

Many people are disillusioned with isolated modern living and are looking for an interdependent lifestyle. They are hungry for community; hungry to live more in harmony with nature and with each other. Bruns Eco Village is a demonstration of how integrated community living can be. The eco village is open to all and will be an inclusive multi-cultural, multi-ethnic community.

---

## Alternative Ownership Model

The dominant worldview in Australia is the success = ownership model. We aim to challenge this view by presenting a real and attainable environment where people can live, work, learn from and support each other.

The Bruns Eco Village approach is an Alternative Ownership Model where you can rent and invest simultaneously. This is an opportunity to divest from financial institutions that continue to invest in unsustainable industries and an opportunity to ethically invest in a not-for-profit community-run eco village that benefits many and provides an attractive return to its investors.

---

## Strong Beginnings

The Bruns Eco Village has been nearly three years in conception. As we prepare to present this integrated living eco village to the public we are standing on strong ground made up of a working group of experts in this field, and a formidable assembly of partners.

The village we are creating will be a multi-use site with an integrated combination of:

- residential clusters;
- an educational facility and workshop space;
- a light commercial / industrial area;
- a wellness facility; and
- a food producing and renewable energy precinct.

It will provide direct and indirect employment in many areas of our community.

We are writing the story of the Bruns Eco Village and we invite you to become a part of that narrative.

**Bruns Eco Village**
