

Our Holistic Approach

Our Vision is to foster a thriving and regenerative world of inclusive community living options where people can live, work and learn.

Our Mission is to create and sustain an eco village in Brunswick Heads that respects the natural habitat, provides housing security, offers a lifelong learning environment and empowers ethical, economic vibrancy.

One Planet Living's international framework guides our vision. It advocates for a world where people enjoy healthy, happy lives with a fair share of the earth's resources, while leaving space for wildlife and wilderness.

It offers ten guiding principles rooted in science. When combined together, the principles provide a holistic framework that helps us examine our sustainability challenges, develop appropriate solutions and communicate the actions being taken."
